**Full-stack engineer** who builds and ships **AI product features end to end**, from the **React** frontend to the **Python** backend to the **LLM systems** behind them. At an early-stage AI startup: led heyneo.com's **v1-to-v2 API migration** and React rebuild as the **only engineer**, own the **Node.js** backend, and shipped the company's **MCP server** (open source, PyPI, **45 releases in 4 months**), the **NeoClaw** agent-orchestration layer, and the **Ornith** model-evaluation framework. Promoted intern to full-time in three months. B.Tech CSE, July 2026.

## Experience

**NEO** (heyneo.com), autonomous AI engineering platform, early-stage startup

**Oct 2025 – Present**

*Full-Stack and AI Engineer | Promoted from Intern to Full-Time in 3 months (Jan 2026)*

*Jaipur, India*

- Led the **v1-to-v2 API migration** and full **React** rebuild of heyneo.com as the **only engineer**, reworking **product pages, user flows, and dashboards** end to end, and rebuilt the public developer docs at **docs.heyneo.com** on **Next.js**.
- Design and own the **Node.js/Express + MongoDB** backend end to end: tuned hot paths with **compound indexes and aggregation pipelines**, added **Redis** caching and **rate limiting**, built **OAuth 2.0/JWT** auth flows, and hold **Jest** coverage on critical routes.
- Shipped **three production LLM features** on the **Claude API** and **LangChain** (research agent, PDF parser, dataset processor) plus the product's **RAG pipelines**.
- Built and published **neo-mcp** (open source, PyPI, MIT), the surface that puts NEO inside **Claude Code, Cursor, VS Code, Zed, and Codex**; own the **tool schemas, structured outputs, auth, and error contracts** across **45 releases in 4 months**.
- Architected **NeoClaw**, a messaging-first AI surface turning one Telegram or WhatsApp message into multi-step work via **subagents over MCP**, with **50+ tools** behind one contract plus **loop detection**, confidence-based **escalation to a human**, and **LLM tracing**.
- Open-sourced the **Ornith evaluation framework** and used it to **benchmark models head-to-head** for NEO's published comparisons, measuring **output quality** before model changes shipped.

**Celebal Technologies**

**Oct 2024 – Feb 2025**

*Data Science Intern*

*Jaipur, India*

- Built **ML and NLP** projects (classification, structure extraction from unstructured documents) with **scikit-learn, pandas, NumPy**.

## Projects

**DocuMind AI**: full-stack document-intelligence platform | [Live demo](#)

**Next.js 15, React 19, FastAPI, LangChain**

- Full-stack RAG platform** for Q&A, summarization, and quiz generation over PDFs: **Next.js 15 (App Router, React 19)**, **TypeScript**, and **MongoDB** with **JWT** auth, backed by an async **FastAPI** microservice (**LangChain, OpenAI API**) for low-latency processing.
- Built **hybrid retrieval** combining **ChromaDB** dense vector search (**SentenceTransformers** embeddings) with **BM25** lexical search; **OCR** ingestion for scanned and digital PDFs (**Tesseract**, **Unstructured, PyPDF**), **knowledge-graph** visualizations (**NetworkX, Mermaid.js, React-Force-Graph**), and **DiskCache** caching to cut token costs on repeat queries.

**Coding Agent**: natural-language CLI that writes real code to disk

**Node.js, Claude Code, opencode, Ollama**

- Node.js CLI** turning a plain-English task into an actual file tree (**Express + JWT** backends, **React** components, configs), with **diff-based updates** and non-destructive skip behavior. **38ms startup, 12 deps, under 50MB memory**, running **offline with no API keys** on local **Ollama** models. Built via **AI-assisted development** (**Claude Code, opencode**) with agent-ready **CLAUDE.md** and **ARCHITECTURE.md**.

**Interview AI**: technical interview platform | [Live demo](#)

**React, TypeScript, Redux Toolkit**

- Parses resumes, generates **LLM-tailored questions** across difficulty tiers, and auto-scores responses; timed assessments with **crash-safe session recovery** and an interviewer **analytics dashboard**. Extending into a **voice-first multi-agent** design (**LangGraph** agents, WebRTC voice, sandboxed execution).

## Technical Skills

**Languages**: TypeScript, JavaScript (ES6+), Python, SQL

**Frontend**: React, Next.js, Redux, Tailwind CSS, responsive UI

**Backend and APIs**: Node.js, Express, FastAPI, REST API design, authentication (OAuth 2.0, JWT), Redis, MongoDB, PostgreSQL

**AI and LLM Systems**: LLM feature development, MCP (Model Context Protocol), Tool Calling, Function Calling, Structured Outputs, Agent Orchestration, Prompt Engineering, Model Evaluation, LLM Tracing, Claude API, OpenAI API, LangChain

**Retrieval**: RAG / retrieval-augmented generation, hybrid search (vector + BM25), vector databases (ChromaDB, FAISS), SentenceTransformers, OCR (Tesseract)

**AI-Assisted Development**: Claude Code, Cursor, opencode, local Ollama models

**Delivery**: Docker, AWS, Git, GitHub, deployment pipelines (GitHub Actions CI/CD), API and integration testing (Jest), Playwright, Vercel

## Education

**JECRC University**

**2022 – 2026**

*B.Tech, Computer Science and Engineering (Cloud Computing) CGPA 8.6/10*

*Jaipur, India*
